SUMMARY

Software Engineer with proven ability in designing and developing robust, scalable **distributed systems** leveraging **Java** and **Spring Boot**. Expertise in building **RESTful micro services**, implementing **event-driven architectures** with **Apache Kafka**, and optimizing database performance with **PostgreSQL**. Skilled in **application design**, **software development**, and implementing **algorithms** to deliver high-performance solutions for core banking and enterprise document management.

SKILLS

Java | Spring Boot | Microservices | RESTful APIs | Apache Kafka | PostgreSQL | Redis | Distributed Systems | Data Structures & Algorithms | Application Design | Software Development | SQL | LLM/AI Integration | AWS | Vertx | Ignite | Spark | Cassandra | Yellowbrick | Automated Testing | Agile

EXPERIENCE

Software Engineer (Product Development Division) — Tata Consultancy Services

02/2025-Present

- Developed fault-tolerant **Spring Boot** service for **distributed microservices**, reducing **Real-Time Payment** recovery time from 5s to <1s.
- Upgraded **TCS Bancs** architecture, migrating **global core banking solution** from legacy PL/SQL to **Cloud-Native Microservices**.
- Actively participated in **Agile** scrum ceremonies, enhancing sprint planning and on-time delivery of **software development** features.

Software Developer — Servosys Solutions

01/2024 – 12/2024

- Engineered **Java** load-balancing, scaling document ingestion throughput 58% (1,200 to 1,900 req/s) with reduced latency.
- Developed **Apache Kafka event-driven pipeline** processing 10,000+ documents daily, reducing search latency by 40% with **AI/ML integration**.
- Developed secure **RESTful APIs** for client integration, implementing **JWT-based authentication** and **RBAC** to protect sensitive document endpoints.
- Implemented comprehensive unit and integration tests for **Spring Boot** microservices, improving code quality and stability by 15%.
- Performed root cause analysis and **debugging** of production issues, resolving defects to ensure 99.9% system availability.

AI-Driven Resume Optimization System — Personal Project

2024

- Engineered **AI-driven** document system using **Gemini Models** to optimize resumes for **keyword matching** and **ATS compatibility**.
- Implemented **Apache Kafka** in **event-driven architecture** for high availability, handling **AI inference tasks** asynchronously.
- Developed robust **Spring Boot microservice** with **Redis** for caching and **PostgreSQL** for storage, reducing lookup latency.

- Designed efficient data pipeline for extracting/mapping document data, maintaining contextual integrity for targeted roles.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, National Institute of Technology, Raipur (05/2024)

ACHIEVEMENTS

- LeetCode Knight — Solved 1300+ Problems; achieved top ranks (810, 983, 1324) in weekly contests.
- Specialist in Codeforces with a maximum rating of 1550.
