SUMMARY

Highly skilled Java Developer with 1 year of experience and substantial project contributions, specializing in building scalable microservices and RESTful APIs using Spring Boot. Proficient in designing event-driven architecture with Apache Kafka and optimizing relational databases like Oracle and PostgreSQL. Demonstrated expertise in distributed systems, high-performance backend development, and cloud platforms (AWS), with valuable experience in the banking and financial services domain.

SKILLS

Java | Spring Boot | Microservices | RESTful APIs | Apache Kafka | Event-Driven Architecture | Redis | SQL | PostgreSQL | Oracle | Data Structures & Algorithms | OOPS | AWS | Java (JDK 17/21) | High-Level Design (HLD) | Low-Level Design (LLD) | Messaging Systems | Database Optimization | Docker | Kubernetes | React.js | Distributed Systems | OpenShift

EXPERIENCE

Software Engineer — Tata Consultancy Services (Product Development Division)

02/2025 – Present

- Engineered fault-tolerant microservices using Spring Boot for Real-Time Payment processing, reducing recovery time to under 1 second.
- Led architecture upgrade for TCS Bancs core banking solution, migrating from monolithic PL/SQL to Cloud-Native Microservices.

Software Developer — Servosys Solutions

01/2024 – 12/2024

- Engineered Java-based load-balancing mechanism to optimize document ingestion, scaling throughput by 58% (1,200 to 1,900 req/sec).
- Developed event-driven architecture using Apache Kafka to process 10,000+ documents daily, reducing search latency by 40%.
- Collaborated within an Agile development environment, reducing feature delivery cycles by 15% through active cross-functional team engagement.
- Implemented secure development practices, conducting schema design and query tuning for Oracle databases, improving data integrity by 10%.

Software Developer Intern — Servosys Solutions

01/2024 – 12/2024

- Developed secure RESTful APIs with JWT authentication and RBAC for client integrations, securing sensitive document endpoints.

Software Developer — Personal Project - Resume Updater

2023

- Engineered AI-driven document processing system using Gemini Models to optimize resumes, improving keyword matching and ATS compatibility.
- Implemented Apache Kafka for event-driven architecture, ensuring high availability and reliable message delivery for AI inference tasks.
- Developed Spring Boot microservices with Redis caching and PostgreSQL storage, optimizing performance and reducing lookup latency.

- Designed efficient data pipelines for complex document data extraction, tailoring technical skills for targeted industry roles.
- Designed High-Level Design (HLD) and Low-Level Design (LLD) for microservices, preparing for Docker and Kubernetes deployment to enhance scalability.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, National Institute of Technology, Raipur (05/2024)

ACHIEVEMENTS

- Achieved LeetCode Knight status with 1300+ problems solved and top ranks in weekly contests.
- Recognized as Codeforces Specialist with a maximum rating of 1550.
