SUMMARY

Highly proficient Software Engineer with 3 years of experience in developing, testing, and maintaining robust Java-based applications. Expertise in Spring Boot, Microservices, and RESTful API development, coupled with strong system design skills leveraging Apache Kafka and Redis. Proven ability to deliver scalable, secure, and performant solutions, including integrating AI models and optimizing complex data pipelines. Dedicated to following clean code principles and participating in the full software development lifecycle.

SKILLS

Java (Core, Java 8) | Spring Boot | Microservices | RESTful APIs | Apache Kafka | Redis | SQL (PostgreSQL, ORACLE) | Data Structures & Algorithms | OOPS | AWS | System Design | LLM/AI Integration | SDLC | Git

EXPERIENCE

Software Engineer — Tata Consultancy Services (Product Development Division)

02/2025-Present

- Built a fault-tolerant Java service using Spring Boot to monitor microservices, reducing recovery time from 5s to under 1s.
- Contributed to upgrading core banking architecture from legacy PL/SQL to Cloud-Native Microservices, processing millions daily transactions.

Software Developer — Servosys Solutions

01/2024 – 12/2024

- Engineered custom Java load-balancing, scaling document ingestion throughput by 58% (1,200 to 1,900 req/s) with optimized latency.
- Developed an event-driven pipeline using Apache Kafka to process 10,000+ daily documents, integrating AI/ML models effectively.
- Developed secure RESTful APIs for client integrations, implementing JWT and Role-Based Access Control for sensitive data.

Software Developer Intern — Servosys Solutions

- Developed secure RESTful APIs for external client integrations, implementing JWT-based authentication and RBAC.

Software Developer — Personal Project

Self-Directed

- Engineered an AI-Driven system using Gemini Models to dynamically optimize resumes for job descriptions and ATS compatibility.
- Implemented Apache Kafka for event-driven architecture, ensuring high availability and reliable message delivery for AI inference tasks.
- Developed a robust Spring Boot microservice utilizing Redis and PostgreSQL for low-latency lookups and persistent storage.
- Designed an efficient data pipeline for extracting and mapping complex document data, focusing on contextual integrity.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, National Institute of Technology, Raipur (07/2020 – 05/2024)
