SUMMARY

Software Engineer with 3 years of experience in developing, testing, and maintaining Java-based applications. Proficient in Spring Boot, Microservices, and RESTful APIs, with expertise in the full software development lifecycle (SDLC). Experienced in database interaction, version control with Git, implementing scalable, secure solutions, and leveraging AI tools with Agile/Scrum practices.

SKILLS

Java (Core, Java 8) | Spring Boot | Microservices | RESTful APIs Design | SQL (PostgreSQL, ORACLE) | Apache Kafka (Event-Driven Architecture) | Redis | Data Structures & Algorithms | OOPS | AWS | Git | SDLC (Software Development Lifecycle) | Agile/Scrum | AI Tools (LLM/AI Integration, Gemini Models) | Unit Testing

EXPERIENCE

Software Engineer — Tata Consultancy Services

02/2025-Present

- Engineered a fault-tolerant Spring Boot microservice to monitor distributed applications, reducing recovery time by 80% to under 1 second.
- Contributed to upgrading a global core banking solution, migrating from monolithic PL/SQL to Cloud-Native Microservices architecture.

Software Developer — Servosys Solutions

01/2024 – 12/2024

- Developed a custom Java-based load-balancing mechanism, scaling document ingestion throughput by 58% while reducing latency.
- Designed an event-driven Kafka pipeline to process 10,000+ documents daily, integrating AI models for entity extraction.
- Developed secure RESTful APIs for client integrations, implementing JWT authentication and Role-Based Access Control.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, National Institute of Technology, Raipur (2024)

ACHIEVEMENTS

- LeetCode Knight with 1300+ problems solved, securing top rankings in weekly contests.
- Achieved Specialist rating in Codeforces with a maximum rating of 1550.
- Engineered an AI-driven resume optimization system using Gemini Models, improving keyword matching and ATS compatibility.
- Developed a robust Spring Boot microservice backend with Redis caching and PostgreSQL for high-performance data management.
- Implemented an event-driven architecture using Apache Kafka for asynchronous processing of heavy AI inference tasks.
