SUMMARY

Results-oriented Software Engineer with proven experience in developing, testing, and maintaining Java-based applications. Expertise in Spring Boot, Microservices, and RESTful APIs, with strong knowledge of event-driven architectures and database management. Adept at participating in the full software development lifecycle (SDLC) and leveraging AI tools to enhance application performance, security, and scalability.

SKILLS

Java (Core, Java 8) | SQL (PostgreSQL, ORACLE) | Spring Boot | Microservices | REST APIs Design | LLM/AI Integration | Apache Kafka (Event-Driven) | Redis | AWS | Data Structures & Algorithms | OOPS | System Design | Git | Agile/Scrum | Application Performance | Security | Scalability | Mockito | Hibernate | JDBC | JPA | JUnit | UI technologies (e.g., Angular/React)

EXPERIENCE

Software Engineer — Tata Consultancy Services (Product Development Division)

02/2025-Present

- Engineered fault-tolerant microservices using Spring Boot for Real-Time Payment processing, reducing recovery time during failures from 5 seconds to under 1 second.
- Upgraded TCS Bancs architecture from legacy monolithic systems to Cloud-Native Microservices, processing millions of daily financial transactions.
- Participated actively in the full software development lifecycle (SDLC) for core banking solutions, contributing to design, development, and deployment.
- Wrote clean, efficient, and well-documented Java code, adhering to strict coding standards for critical financial applications.

Software Developer — Servosys Solutions

01/2024 – 12/2024

- Engineered custom Java load-balancing for document ingestion, scaling throughput by 58% (1,200 to 1,900 requests/sec) and reducing latency.
- Developed event-driven pipelines using Apache Kafka to process 10,000+ documents daily, integrating AI/ML models to reduce search latency by 40%.
- Developed and executed comprehensive unit tests for Java applications, ensuring code quality and application reliability.
- Collaborated effectively with cross-functional teams, including QA and Business Analysts, following Agile/Scrum development practices.

Software Developer Intern — Servosys Solutions

07/2023 – 12/2023

- Developed secure RESTful APIs with JWT authentication and RBAC for client integrations, protecting sensitive document endpoints.

AI-Driven Resume Optimizer — Project (Self-Directed)

04/2023 – 06/2023

- Engineered an AI-Driven document processing system using Gemini Models, optimizing resumes for ATS compatibility and keyword matching.

- Implemented Apache Kafka for event-driven architecture, decoupling resume processing tasks and ensuring high availability during peak AI inference.
- Developed a Spring Boot microservice with Redis caching and PostgreSQL storage on AWS, reducing lookup latency for job descriptions.
- Designed efficient data pipelines for extracting and mapping complex document data, ensuring contextual integrity and tailored skill alignment.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, National Institute of Technology, Raipur (05/2024)

ACHIEVEMENTS

- LeetCode Knight — Solved 1300+ problems, secured ranks 810, 983, 1324 in weekly contests.
- Codeforces Specialist — Achieved a maximum rating of 1550.
