SUMMARY

Results-driven Software Engineer with 1+ year of experience in developing, testing, and maintaining robust Java-based applications. Proficient in Spring Boot, Microservices, and RESTful API development. Skilled in the full software development lifecycle (SDLC), database management with SQL, and version control using Git. Proven ability to implement scalable solutions, ensure application performance, and integrate AI tools for enhanced functionality, aligning with Agile/Scrum development practices.

SKILLS

Java (Core, Java 8) | SQL (PostgreSQL, ORACLE) | Spring Boot | Microservices | REST APIs Design | LLM/AI Integration | Apache Kafka (Event-Driven) | Redis | Data Structures & Algorithms | OOPS | AWS | Git | SDLC (Software Development Lifecycle) | Agile/Scrum

EXPERIENCE

Software Engineer — Tata Consultancy Services (Product Development Division)

02/2025-Present

- Developed a fault-tolerant monitoring service using Spring Boot for distributed microservices, implementing leader-election failover to reduce recovery time to under 1 second, ensuring uninterrupted Real-Time Payment processing.
- Contributed to upgrading TCS Bancs architecture, migrating a global core banking solution from legacy monolithic PL/SQL to Cloud-Native Microservices to process millions of daily financial transactions.

Software Developer — Servosys Solutions

01/2024 – 12/2024

- Engineered a custom Java-based load-balancing mechanism to optimize document ingestion, scaling throughput by 58% (1,200 to 1,900 requests/second) while reducing latency.
- Developed an event-driven pipeline using Apache Kafka to process 10,000+ documents daily, integrating AI/ML models for entity extraction and reducing search latency by 40%.

Software Developer Intern — Servosys Solutions

Dates not specified (Pre-2024)

- Developed secure RESTful APIs for client integrations, implementing JWT authentication and Role-Based Access Control (RBAC) to secure sensitive document endpoints.

AI-Driven Resume Optimizer — Personal Project: Resume Updater

Project-based

- Engineered an AI-driven document processing system using Gemini Models to dynamically re-write resumes, improving keyword matching and ATS compatibility.
- Implemented Apache Kafka in an event-driven architecture to decouple processing tasks, ensuring high availability and reliable message delivery for AI inference tasks.
- Developed a robust Spring Boot microservice utilizing Redis for caching and PostgreSQL for persistent storage, hosted on AWS, to reduce latency for job description lookups.
- Designed an efficient data pipeline for extracting and mapping complex document data, ensuring contextual integrity and tailoring technical skills for industry roles.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, National Institute of Technology, Raipur (2024)

ACHIEVEMENTS

- LeetCode Knight with 1300+ problems solved, securing top ranks (810, 983, 1324) in weekly contests.
- Achieved Specialist rating (1550) on Codeforces.
